

Quantum Effects

Exhibition and Conference
for Quantum Technologies

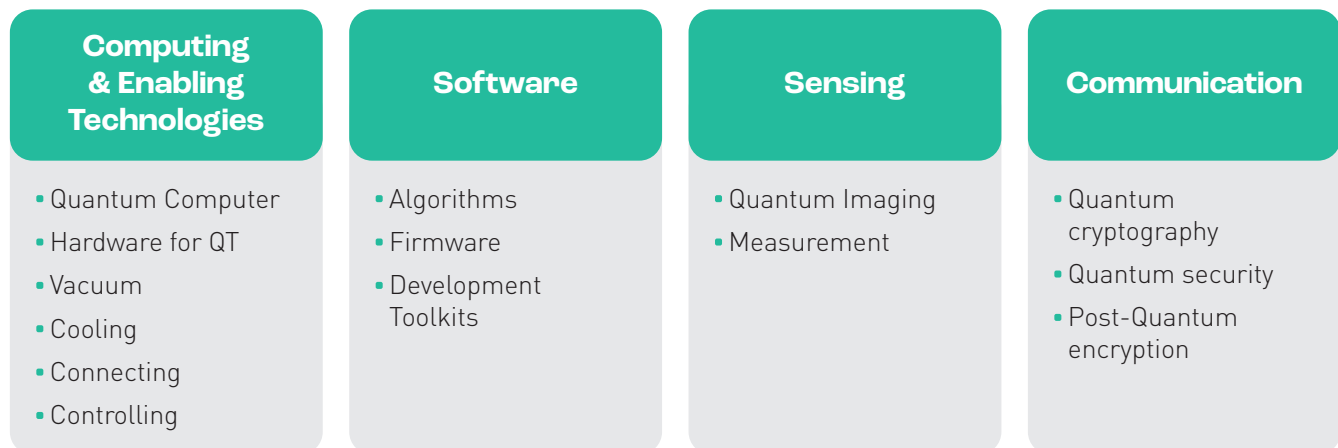

**07– 08
October 2025**
Messe Stuttgart
Germany

Our Vision and Mission

After its successful première in 2023 and an impressive growth in 2024, Quantum Effects has **established itself as the leading annual international exhibition and conference for application-oriented quantum technology.** With its international focus, Quantum Effects is advancing Europe's role in the global race for quantum technology creating a platform for **inspiration, collaboration and the transfer of knowledge from research** to market-ready applications.

The four pillars of Quantum Effects

Meet your customers from the user industries

We are driving the commercialisation of the four pillars in the following sectors.

- Mobility
- Energy
- Finance and Insurance
- Logistics and Transport
- Aerospace
- Trade
- Mechanical and plant engineering
- Medical Technology
- Pharmaceuticals/ Chemistry/ Biotechnology
- Telecommunications & IT

NEW in 2025: The Game Changer Area

With the Game Changer Area, we are specifically linking quantum technologies with industry. Exchange formats clustered by topics and matchmaking opportunities promote knowledge transfer, partnerships and commercialisation - for newcomers as well as experts from research and industry.
